EXPERIENCE

I have attended every competition held since joining the society, and along with my mooting partner, I made it to the final of the NOVICE CUP, along with placing third in the ELSA and PALATINATE moots. I love to compete, and I've gained a wealth of experience in doing so – I hope to help in making next year just as involved and exciting!

LADDER

Mooting is all about getting one up on your buddies in the legal arena; I hope to fuel the competition by working with the exec to organise an internal Mooting Society ladder, with regular informal moots and an interactive online scoreboard. I hope to make mooting problems relevant to current modules.

EXEC

I am already on good terms with many members of the new exec, and I've learnt a great deal about running competitions through dialogue with current members of the society, the previous exec, and the judges of the various competitions I've attended. I feel entirely confident and ready to take up this position.

WEBSITE

I'm a competent web designer and programmer, and my first course of action upon joining the exec will be to create a new online ladder system, mooting problem discussion board, and a suggestion system for future mooting problems, events and workshops. We must extend beyond facebook!
